

3.2.1 - The Institution has created an ecosystem for innovations including Incubation Centre and other initiatives for creation and transfer of knowledge. Describe the available Incubation Centre and evidence of its functioning (activities) within 100 - 200 words

Facilities and Innovations at Dr. Ulhas Patil Medical College & Hospital

Dr. Ulhas Patil Medical College & Hospital has developed a comprehensive environment that promotes innovation, research, and academic training.

To support these initiatives, the institute has established an **incubation center** that encourages research and innovation, backed by key facilities such as the **Molecular Diagnostic Lab (MDL)**, **Central Research Laboratory (CRL)**, **Simulation Skill Lab**, and an **Adverse Drug Reaction (ADR) Monitoring Center**.

A **plagiarism detection system** is in place to uphold research integrity, and its use is communicated to all stakeholders.

The **CRL** serves as a central hub for research, offering infrastructure for undergraduate, postgraduate, and faculty projects. It is fully equipped with modern instruments and maintains an up-to-date inventory for research needs.

The institute regularly organizes **workshops and training sessions** on research methodology, good clinical practices, pharmacy collection, and statistical analysis to enhance research skills.

As a recognized **ADR Monitoring Center** under the **Pharmacovigilance Programme of India (PvPI)**, the college contributes to drug safety and awareness.

Additionally, the institution offers community healthcare services, allowing students to gain practical clinical experience and enhance their skills.

These initiatives collectively foster a culture of **innovation, research excellence, and knowledge dissemination**.

Dean,
Dr. Ulhas Patil Medical College
& Hospital, Jalgaon Kh.
