|      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                       |                           |                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                | 00         | · ·         | 1        |

SSTuli.

ii) Describe the pathogenesis and the laboratory diagnosis of this condition (3+8)

# Q. No 4 short Answer Questions: (Any four out of five) (7X 4=28)

- a. Mr. Marsh, a 25-year-old Australian visited his local doctor complaining of difficulty in swallowing liquids, loss of appetite and restlessness. He had a travel history to India one month back and did mention being bitten by a street dog in Puducherry. (2+5)
  - i) Draw a labelled diagram of the Causative agent.
  - ii) Discuss the laboratory diagnosis of the same.
- b. A 68 year old diabetic male with AML (Acute myeloid leukaemia) receiving Azacitine developing fever during course of treatment. Recorded oral tempopearture was 39. C.CBC was done and absolute neutrophill count was less than 400 per microliter.
  - i) Identify the case and define opportunistic infection (1+1)
  - ii) What are the organisms and risk factors are associated with opportunistic Infection.(2+3)
- c. A 23-year-old male having a history of sexual exposure with a commercial sex worker is presented to a STD clinic with painless hard indurated genital ulcer and painless hard lymph node. (1+6)
  - i) What is your clinical diagnosis?
  - ii) Discuss its the laboratory diagnosis
- d. A 70 year old male got admitted to neurology ward for neurological examination problems including loss of memory. At time of admission, his other systems including pulmonary did not reveal any abnormalities. After 3 days of admission he complained of breathlessness ,purulent sputum, and chest radiography reveal infiltrate in the right upper lung. (1+2+4)
  - i) What is your diagnosis, ii) Enumerate microorganisms which responsible for this condition iii) Add note on standard precautions.
- e. Define congenital infections and Write a note on TORCH infections (1+6)

## Q. No 5 Long Answer Questions

A 32-year-old female was admitted with dysuria (burning micturition) and increased frequency of micturition for the past 2 days. Culture of the urine specimens revealed lactose fermenting colonies on MacConkey's agar. (2+3+7)

- i). What is your clinical diagnosis and probable etiolgical agents?
- ii) . Describe its pathogenesis.
- iii). Describe the laboratory diagnosis of it in detail.

Instruction: 1. All questions are compulsory

- 2. The number to the right indicate full marks
- 3.Do not overwrite anything on the Question paper
- 4. Draw diagrams wherever necessary.
- 5. Questions can be asked from any paper's syllabus into any question paper, any claim concern with this will not be entertained

Section -B ( Q2.Q3.Q4& Q5)

Q.No.2.Short Answer Questions: (Any four out of five)( 7X 4=28)

a. Vijay, a 23- year- old male was admitted 5 days after a crush injury to his right leg following a road traffic accident. He had been treated by a local village quack. On examination, the wound which was bandaged with a soiled gauze, appeared to be heavily to have been crushed, there was edema and pain at the site and crepitus was felt on palpation.

and al i) Describe in detail the pathogenesis of this condition.

ii) Describe in detail the laboratory diagnosis of this condition. b. Write pathogenesis and laboratory diagnosis of leprosy

NE Marie short and laboratory diagnosis of leprosy

NE Strike short and laboratory diagnosis of leprosy diagnosis

bout cutaneous filariasis. d. A middle age male had developed characteristic well-demarcated annular or ring- shaped pruritic scaly skin lesions with central clearing and raised edges. Culture of the skin scraping done on Sabouraud's dextrose agar reveals velvety colonies with red pigment on the reverse. Microscopy of the culture isolate reveals plenty of tear drop shaped microconidia and few, long, pencil- shaped macroconidia.

What is the clinical diagnosis and what is the most likely etiological agent?

Describe the various clinical manifestations produced by the organism. In Add a note on the laboratory diagnosis of this condition.

e. describe in detail about categories of biomedical waste. H C Q.No 3Long Answer Questions

a. Sarvesh, a 28-year-old male, was admitted to the hospital with complaints of low-grade fever, loss of weight and appetite and chronic cough with expectoration for past 6 months. Sputum examination revealed long, slender and beaded acid- fast bacilli.

a. What is your provisional diagnosis?
